

DISSATISFIED WITH YOUR COMPANY'S HEALTH INSURANCE CHOICES?

WE ARE, TOO!

It seems like there are not many good insurance choices these days. Health care premiums AND their deductibles continue to rise, costing both employer and employee. As these expenses increase, access to the care you need seems more limited, leaving consumers frustrated and confused.

The trend of health insurance continues toward expensive treatment with limited options. And the coverage is aimed mainly at catastrophic illness. While this coverage is needed, it is simply not enough. Current health insurance plans do little to help us stay healthy.

On average, employers pay more than 90 % health care expenses, which include not only insurance coverage, but also the cost of poor employee health, absenteeism, limited health access to care, and employees who are distracted with health concerns.

Employers and employees want options. While health insurance options might seem beyond our control, the health of our employees is not. To cut the overall cost of health care, focus on improving the health of your employees. Health Performance Programs create work environments that encourage healthy behaviors, provide for early intervention and access to trusted health care education. All which remain under your control.

Employees are at their best when they are healthy and feel good. By focusing on ways to improve employee health, you will save money and keep your employees feeling good and productive on their job.

BRIOWORKS keeps employees healthy, and on the job.

QUICK STATS:

- Healthcare costs have risen to the 2nd largest employer expense behind wages.
- US healthcare expenditures exceed \$2 trillion per year.
- Companies pay for more than 90% of all healthcare.
